FOREWORD

THE 1964 North Carolina Directory of Manufacturing Firms is a completely revised and expanded listing of North Carolina firms engaged in manufacturing and represents the sixth such effort of the Department of Labor. The information for this Directory was obtained directly from the industrial firms through the questionnaire method.

Information gleaned from questionnaires returned resulted in the listing of approximately 6200 manufacturing establishments in this Directory. Some companies undoubtedly have been omitted, due possibly to their failure to return the questionnaires and to oversight or inadequate checking of listings by local sources. While this Directory cannot be considered complete, it is the most comprehensive work of its type available in the State.

The Directory is compiled as a service to businessmen and others in an effort to promote industrial growth of North Carolina through the expansion of markets and the attraction of new industries to the State.

Grateful acknowledgment is due the many company officials, plant owners, local Chambers of Commerce and Industrial Committees, State agencies, public officials, trade organizations, newspapers and private citizens who have assisted in providing information and in checking data on the industries in their respective areas. The department will appreciate having called to its attention any omissions or needed corrections.

INTRODUCTION

In Order to Increase the usefulness of this Directory, we have prepared it in three parts: an alphabetic listing of establishments, and industry or product listing, and a geographic or county listing.

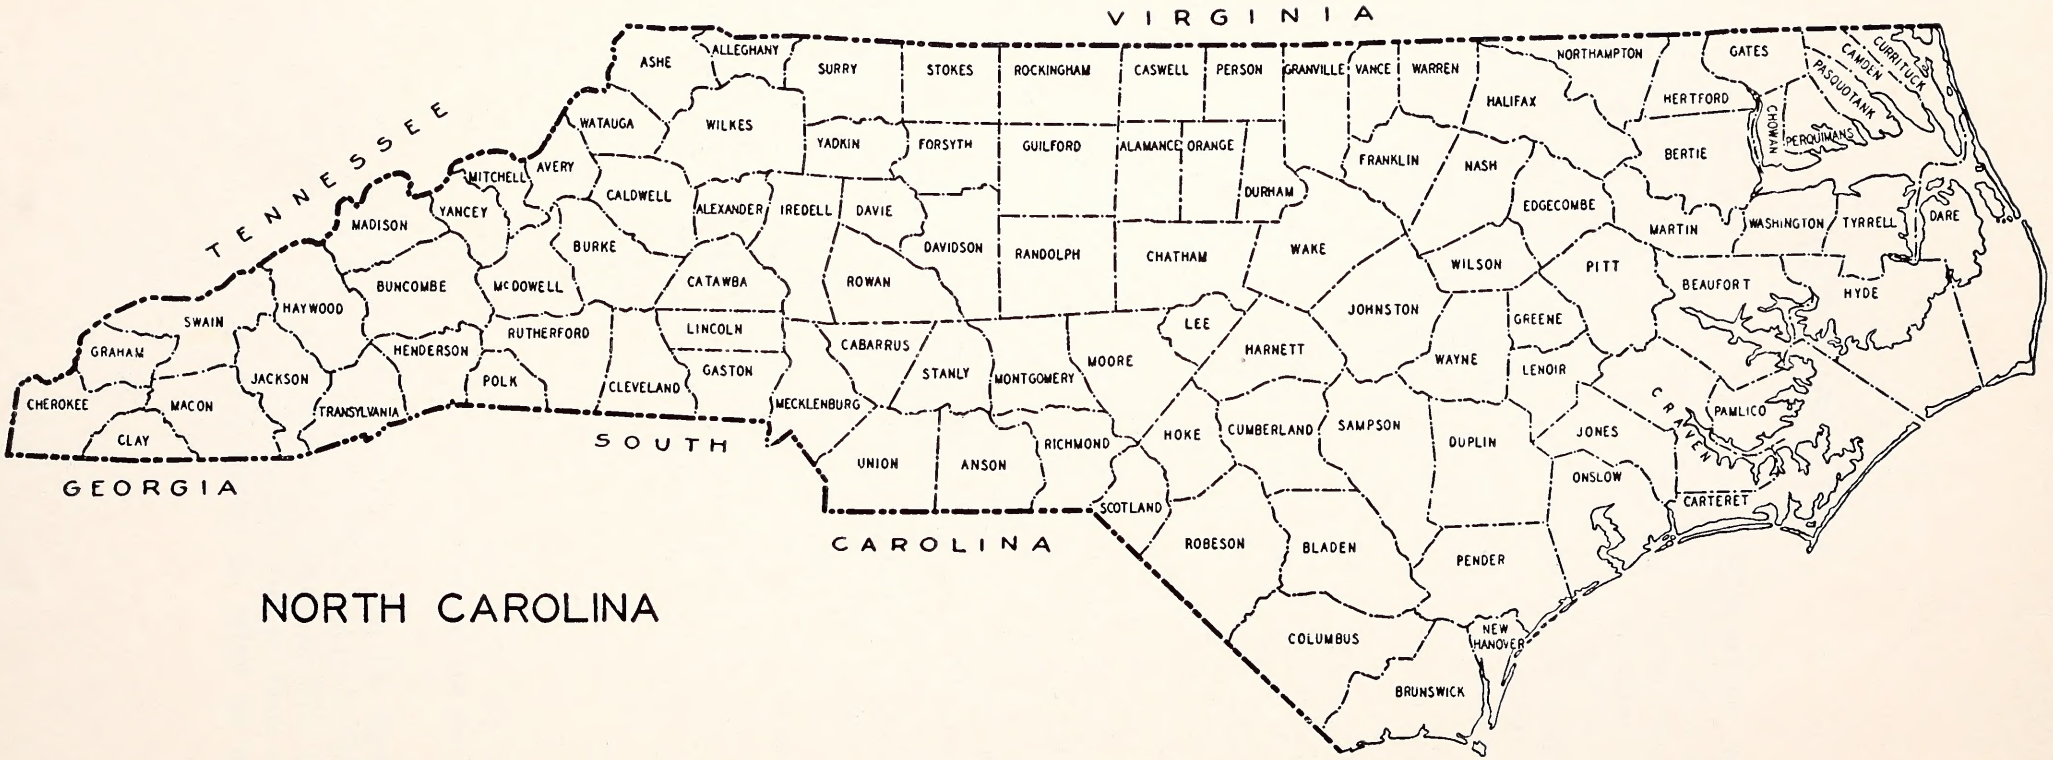

Questionnaires were sent to all manufacturers whose names appeared in the *1960 North Carolina Directory of Manufacturing Firms.* Questionnaires also were sent to firms not listed in the previous Directory but which, as a result of a check of our records and those of other state agencies, where available, were found to be operating. Follow-up requests went to those firms which failed to return the questionnaires in a reasonable length of time. Firms which failed to respond to either of these efforts are *not* included in this Directory.

Each establishment is listed in the Directory three times, once under each of the classifications referred to above. Since each listing is complete in itself, it is not necessary to refer from one section of the Directory to another for full information about a particular establishment.

Data concerning all establishments are presented in a uniform manner throughout this Directory. Following each listing of a firm name, the mailing address of the firm is given. If the firm's physical location is different from its mailing address, a second address is shown, this one giving the actual location of the plant. Where the plant location and mailing address are identical, the address is *not* repeated . Following the information about the firm's address and location, the name of a plant officer is given, if known, followed by an abbreviation indicating his official title. In the right hand margin opposite each listing will be found a series of seven numbers. The first two digits of this series represent the county code. The next four digits indicate the firm's industrial classification. The final digit is a key to the size of the firm. The following example is given as an illustration:

	COUNTY CODE	INDUSTRY	SIZE OF FIRM
John Doe Co., P. O. Box 1, Cary	**92**	**2421**	**1**
12 Smith St., Robt. Doe, M.			

On page XI will be found the county code and index and on pages XIII through XXVIII will be found the industry code and index. It will be noted that the Standard Industrial Classification system is used in this Directory. A key to the establishment size code and to titles of establishment officers is included on page XII.
